System Use Case Specification
SUC-001: View Booking

Characteristic Information	
Description	When the Actor needs to view the details of a Booking, the Actor must search for the booking using Search Parameters. If the System identifies a more than one matching Booking, the Actor must choose the matching Booking to view and then the System provides the full details of that Booking. If the System identifies only one matching Booking, then it provides the details of that Booking directly.
Priority	High
Primary Actors	• Booking Agent • Booking Team Supervisor
Secondary Actors	• None
Preconditions	• Actor has logged on to the System
Triggers	• Actor elects to view a Booking
Primary Post Conditions	• Booking details are provided to the Actor
Alternate Post Conditions	A1: • Same as Primary
Exception Post Conditions	E1: • Actor is informed that no Bookings matched the Search Criteria
Related Use Cases	• None

Primary Path				
Scenario Action				**Comments**
Step	**User Action**	**Step**	**System Response**	
		1	System requests Search Parameters (See Data Dictionary)	
2	Actor provides Search Parameters	3	System identifies matching Bookings (See BR-001) Primary Path: More than one matching Booking (See Alternate Path 1 and Exception Path 1)	
		4	System provides list of matching Bookings (See Data Dictionary)	
5	Actor indicates Booking to view	6	System provides Booking Details (See Data Dictionary)	
At this point the Use Case ends.				

Alternate Paths				
Secondary Path 1 ***Context: System Identifies only one matching Booking***				**Comments**
Step	**User Action**	**Step**	**System Response**	
In this scenario, the process proceeds directly to step 6 of the Primary Path.				

Exception Paths				
Exception Path 1 ***Context: The System identifies no matching Bookings***				*Comments*
Step	**User Action**	**Step**	**System Response**	
		1	System indicates that no Bookings match the parameters	
At this point the Use Case ends.
